

UNIVERSITY OF GENOVA

*Doctorate School of Sciences and Technologies
of Chemistry and Materials*

XXIV CYCLE YEARBOOK

The Doctorate School in Sciences and Technologies of Chemistry and Materials was born in the spring of 2005, when the Ministry of Education and Research has urged all the universities to better rationalise and organize the doctorate courses. Although the guidelines given by the Ministry were not very precise, in my personal opinion the Doctorate Schools should be dedicated to the organization and supervision of different doctorate courses in areas affine from the scientific point of view. They should establish general rules common to all students and organize the coursework as a whole (whereas in the past the course work has been organized and regulated independently by each doctorate course).

For this reason, this newborn School, instead of trying to gather together teachers belonging to the same Faculty, preferred to assemble scientists who can share similar scientific interests, irrespective to the Faculty or Department they belong to. The School spans all the subjects related to chemistry (including medicinal chemistry, food and cosmetic chemistry, environmental chemistry, industrial and polymer chemistry, but excluding biochemistry) plus material science (with contributions from chemists, physics and engineers). Accordingly, the school has activated three discrete doctorate courses:

- Chemical Sciences and Technologies
- Pharmaceutical, Food and Cosmetic Science
- Material Science and Technology

The School begun its activity on january 1, 2006 and thus the XXIV cycle was the fourth one to be organized by it.

From 2011 the Doctorate School holds the ECTN Chemistry Doctorate EUROLABEL®

At the end of december 2011, 14 out of the 17 students of the XIV cycle of the School have finished their program. Three of them resigned during the programme (Claudia Calcagno, Giuseppe Christian Fusella and Roberto Mangano).

The remaining 14 students have passed the final defense on february 8 or 9, acquiring the degree of "Research Doctor". Furthermore, on the same dates, two students from previous cycles (Federico Wrubl, XXII cycle) and Chiara Rotolo (XXIII cycle) acquired the degree too.

During an official ceremony held on February, 9, I had the honour and the pleasure to deliver to all these 16 students a final certificate, reporting all their activities during the doctorate. As already done in the last years, I have now put together all these certificates, adding some general informations about the School.

I hope that this "yearbook" could remain for the new Doctors as a memory of these three years dedicated to the advancement of science, and, I am sure of that, also to the improvement of their own scientific skills and human merits.

To all of them I would like to present my best wishes for a successful and gratifying carreer!

Director of the School

MANAGEMENT COUNCILS OF THE SCHOOL

The school is governed by a **Board of Professors**, formed by 12 members, who elect a Director. For the XXIV cycle the board of professors was formed by:

- Luca Banfi (director), DCCI, Organic Chemistry
- Giovanni Carlo Alfonso, DCCI. Industrial Chemistry
- Alessandro Balbi, DISCIFAR, Medicinal Chemistry
- Gabriella Borzone, DCCI, Inorganic Chemistry
- Guido Busca, DICheP, Industrial and Technological Chemistry
- Alessandra Gliozzi, DIFI, Applied Physics
- Silvia Lanteri, DICTFA, Analytical Chemistry
- Emanuele Magi, DCCI, Analytical Chemistry
- Franco Merlo, DCCI, Physical Chemistry
- Angelo Ranise, DISCIFAR, Medicinal Chemistry
- Saverio Russo, DCCI, Industrial Chemistry
- Carla Villa, DISCIFAR, Pharmaceutical technologies

Each doctorate course has a coordinator and a specific **Board of Professor**. For the XXIV cycle the boards of professors were formed by:

Chemical Sciences and Technologies

- Luca Banfi (coordinator), DCCI, Organic Chemistry.
- Enrico Franceschi, DCCI, Physical Chemistry
- Emanuele Magi, DCCI, Analytical Chemistry
- Enrico Marsano, DCCI, Industrial Chemistry
- Franco Merlo, DCCI, Physical Chemistry
- Maria Rosa Pinasco, DCCI, Metallurgy
- Saverio Russo, DCCI, Industrial Chemistry
- Adriana Saccone, Inorganic Chemistry
- Sergio Thea, DCCI, Organic Chemistry

Medicinal, Food, and Cosmetic Sciences

- Alessandro Balbi (coordinator), DISCIFAR, Medicinal Chemistry
- Annamaria Bassi, DMES, General Pathology
- Vincenzo Bertini, DICTFA, Organic Chemistry
- Raffaella Boggia, DICTFA, Food Chemistry
- Silvia Lanteri, DICTFA, Analytical Chemistry
- Emilia Mariani, DISCIFAR, Pharmaceutical Technologies
- Angelo Ranise, DISCIFAR, Medicinal Chemistry
- Bruno Tasso, DISCIFAR, Medicinal Chemistry
- Carla Villa, DISCIFAR, Pharmaceutical Technologies

Material Science and Technology

- Gabriella Borzone (coordinator), DCCI, Inorganic Chemistry
- Giovanni Carlo Alfonso, DCCI. Industrial Chemistry
- Guido Busca, DICheP, Industrial and Technological Chemistry
- Maurizio Canepa, DIFI, Experimental Physics
- Giacomo Cerisola, DICheP, Chemistry Foundations of Technologies

- Maurizio Ferretti, DCCI, Physical Chemistry
- Enrico Galleani, DIFI, Experimental Physics
- Alessandra Gliozzi, DIFI, Applied Physics
- Gianguido Ramis, DICheP, Chemistry Foundations of Technologies

The **Scientific Committee**, formed by experts outside the university of Genova, has the function of evaluating the activity of the school and to propose recommendations for its improvement. It must issue a report at the start of each cycle, containing possible suggestions, and an evaluation report at the end of each cycle. For the XXIV cycle it was formed by:

- Jean-Pierre Bros, université Aix-Marseille 1 (France)
- Giovanni Camino (Politecnico di Torino ad Alessandria)
- Fabio Comin, ESRF, Grenoble (France)
- Cristina Emanuel (L'Oreal, Milano)
- Sergio Fera (ILVA, Genova)
- Stephen Hanessian, Université de Montréal (Canada), and University of California, Irvine (USA).
- Alberto Modelli, ST Microelectronics, Agrate Brianza (MI)
- Angelo Nora (FACI, Carasco)
- Daniele Piomelli (IIT, Genova and UC, Irvine)
- Bernard Testa, Università Lausanne (Switzerland)
- Antonio Triolo, Menarini Ricerche (Firenze)

RESEARCH ACTIVITY

The total number of credits achieved in 3 years is 180. The research activity is the most important part of the doctorate course. Therefore the School has decided that this activity must correspond to a minimum of 150 credits and a maximum of 160 credits.

The research and course activities of the School are held in the followings Departments: Dep. of Chemistry and Industrial Chemistry (DCCI), Dep. of Pharmaceutical Sciences (DISCIFAR), Dep. of Chemistry and Pharmaceutical and Food Technologies (DICTFA), Department of Chemical and Process Engineering "G.B. Bonino" (DICheP), Department of Physics (DIFI).

At the end of each year, the students presented a written report and an oral presentation on their activity, which were evaluated by the Board of Professor of the specific doctorate.

COURSEWARE

The remaining 20 to 30 credits are divided into these categories:

- Type A credits: short courses (4-6 hours) given by experts external to the university of Genova. Each course will have a value of 1 credit.
- Type B credits: courses given by the faculty of the School. 1 credit will correspond to 7 hours of lessons. The courses will be either of 2 or 3 credits.
- Type C credits: attendance to seminars held at the Departments involved (or in special cases also elsewhere). 1 credit corresponds to 8 seminars.
- Type D credits: participation to national or international schools for Ph.D. students. Typically a week school will count as 2 credits.
- Type E credits: the student will prepare (also through a bibliographic search) and present a seminar on a particular subject (different from its own research work). A seminar of this kind will correspond to 2 credits.
- Type F credits: only in particular cases, when the student must fill an important gap in disciplines necessary for his/her research work, the student can be invited by the Board of Professors to attend courses activated inside one of the "master" laureas related to the subjects of the school.

Each student has chosen the distribution of these credits according the specific rules independently established by each doctorate course.

During the three-year period spanned by the XXIV cycle, the School has activated **21 type A Courses** and **24 type B courses specific for the doctorate (for a total of 55 credits)**, plus other 7 courses in common with the master degrees. The School has informed of about 80 seminars given at the University of Genova and related to the subjects of the School. The courses, schools, workshops and seminars followed by each student are listed in the following certificates.

STUDENTS OF XXIV CYCLE

Students who completed in due time the Doctorate Programme

- Francisco Ardini (STC)
- Lucia Bagnasco (STC)
- Emma Barbareschi (STC)
- Antonello Bignasca (STC)
- Valentina Caratto (STM)
- Paola Cirrincione (SFAC)
- Simona Erika Cozza (STM)
- Lucia Frassoni (STM)
- Wishwanath Kalyani (STC)
- Anna Maria Lanteri (SFAC)
- Francesca Musumeci (SFAC)
- Kieu Nguyen (STC)
- Giulia Priarone (SFAC)
- Alessia Provino (STC)

Students from previous cycles who underwent the defense in 2012

- Chiara Rotolo (SFAC)
- Federico Wrubl (STC)

Thesis Title:

High temperature behaviour of advanced and standard metallic materials for use in power plants

Defense Date:

February 9th, 2012

On February 9th, 2012, at the Department of Chemistry and Industrial Chemistry, Emma Barbareschi has orally presented her doctorate research work in front of the Commission, formed by

- Prof. Paolo Ferloni, University of Pavia
- Prof. Ornella Abollino, University of Torino
- Prof. Gabriele Cacciamani, University of Genova

The written Dissertation had been previously sent to the Commission members. After careful examination of the Dissertation, of the student's oral presentation, of the overall activity of the student during the three years of doctorate studies, the Commission

Study of Novel Approaches for the Preparation of Nanostructured Polymeric Films with Unique Properties

Defense Date:

February 8th, 2012

On February 8th, 2012, at the Department of Chemistry and Industrial Chemistry, Erika Simona Cozza has orally presented her doctorate research work in front of the Commission, formed by

- Prof. Guido Biscontin, University of Venezia
- Prof. Carla Cannas, University of Cagliari
- Prof. Gilda Zanicchi, University of Genova

The written Dissertation had been previously sent to the Commission members. After careful examination of the Dissertation, of the student's oral presentation, of the overall activity of the student during the three years of doctorate studies, the Commission

ACTIVITY REPORT

Research Activity

The research activity was mainly carried out at the Department of Chemistry and Industrial Chemistry (University of Genova). However, Erika Simona Cozza **has also spent a 7 months period abroad**, at Tufts University, Medford (MA, U.S.A.) in the research laboratory of Prof. Peggy Cebe (Polymer Physics Group), from Jan. 17, 2011 through July 31, 2011. Furthermore, she collaborated, throughout the whole doctorate, with Politecnico di Torino, Alessandria location.

ACTIVITY REPORT

Research Activity

The research activity was mainly carried out at the Department of Chemistry and Pharmaceutical and Food Technologies (now Department of Pharmacy) (University of Genova). However, Anna Paola Lanteri has also **spent a 5 months period abroad**, at the Department of Plant Microbe Interactions, University of Utrecht (NL), (10/10/2010-28/02/2011). Moreover, in 2009, she often went to Research Centre "Sperimentazione e Assistenza Agricola" in Albenga (Savona) in order to carry out special measurements.

ACTIVITY REPORT

Research Activity

The research activity was mainly carried out at the Department of Chemistry and Industrial Chemistry (University of Genova). However, Federico Wrubl has also spent a research period of 1 month abroad, at the University of Vienna, Institut für Physikalische Chemie, from 19/5/2008 to 17/6/2008. He has also spent a research period of 2 months abroad, at the Tata Institute of Fundamental Research of Mumbai (India), in the group directed by Prof. S.K. Dhar, from 2/3/2009 to 30/4/2009. Finally he has also carried out diffraction experiments in Grenoble, from 26-29/6/2008 and 19-20/5/2009.
